Amount: \$4,750

Funding Source: Non-Signal Intersection Improvements Funds

Dept./Division: PW/Traffic Engineering

PURPOSE/BACKGROUND:

A segment of Valley View Boulevard north of Sahara Avenue has been found by the Nevada Department of Transportation Safety Division to be a "High Crash Location." As such, they propose mitigating this high crash location by installing a raised median to partially restrict turning movements that have been found to cause the majority of the accidents. Because the location qualifies as a "High Crash Location," it is eligible for Federal Hazard Elimination Funding provided that the City covers a 5 percent match. As such, this agreement sets forth the City's acceptance of the 5 percent match requirement and approves allocation of \$4,750 from the Traffic Engineering Division's Non-Signal Intersection Improvements Funds.
